TENANT CONSTRUCTION OR ALTERATION APPLICATION

APPLICANT MUST READ THE TERMS AND CONDITIONS PRINTED ON THE REVERSE HEREOF

The Applicant shall not commence performance of any of the said work prior to the receipt by Applicant of a copy of this application duly signed in Part Two hereof on behalf of The Port Authority of New York and New Jersey. Upon receipt thereof, the Applicant agrees to perform said work in accordance with the following "Information to be Furnished by Applicant" and to comply with and be bound by all requirements and conditions set forth below under the remarks, if any, in Part Two hereof and the terms and conditions set forth on the reverse hereof.

PART ONE: Information to be furnished by Applicant (Refer to your lease or permit for required information)

Permission is hereby requested to perform the following described work on the space occupied by the Applicant

AT (FACILITY)	PURSUANT TO (LEASE, SPACE PERMIT) NUMBER	LOCATION (BUILDING NUMBER OR AREA) OF SPACE TO BE ALTERED
WTC	WTC-OL-92567.4	TOWER 1 89TH FLOOR

DESCRIPTION OF WORK AND REASON
REMOVE PORTIONS OF EXISTING DEMISING WALL, INSTALL WALL SYSTEMS TO ENCLOSE 2 OFFICES. INSTALL HAWORTH SYSTEMS FURNITURE WITH POWER/DATA/TELEPHONE, NEW CEILING GRID & TILE PAINT & CARPET. NEW MILLWORK SHELVING IN EXISTING SPACE. NO STRUCTURAL WORK.

ESTIMATED COST OF WORK	ESTIMATED TIME TO COMPLETE (DAYS)	STARTING DATE	COMPLETION DATE
$ 40,000.00	30 DAYS	09/06/99	9/31/99

Plans: Prints of each drawing must be submitted with copies of application. Include floor plan and show area affected by proposed work (size 8 1/2" x 11" or larger).

TITLE OF DRAWING	DRAWING NUMBER	DATED

BACKING	Perma Bac

"This test report relates to installation in accordance with the criteria set forth in the report. Any variation in the criteria may produce different results."

TEST RESULTS:

AVERAGE CRITICAL RADIANT FLUX	.52 Watts/Square Cm

GENERAL PRINCIPLE:

OFFICE COPY

This procedure is designed to measure the critical radiant flux at flame out, of horizontally mounted floor covering systems exposed to a flaming ignition in a test chamber which provides a graded radiant heat energy environment. The imposed radiant flux simulates the thermal radiation levels likely to impinge on the floors of a building whose upper surfaces are heated by flames of compartment. The test result is an average critcal radiant flux (watts/square cm) which indicates the level of radiant heat energy required to sustain flame propagation in the flooring system. Theoretically, if a room fire does not impose a radiant flux that exceeds this critical level on a corridor floor covering system, flame spread will not occur.

TEST REPORT

TEST NUMBER:	0039811
DATE:	04/11/96

CLIENT:	NETWORX/DIV. OF SHAW IND.
TEST METHOD CONDUCTED:	ASTM E662-93 Specific Optical Density of Smoke Generated by Solid Materials, also referenced as NFPA 258

DESCRIPTION OF TEST SAMPLE:

IDENTIFICATION:	59341 Resonance Square
COLOR:	41440 Light Delft
ROLL:	165228-5
CONSTRUCTION:	Tip Sheared Loop Pile
FIBER:	DuPont Antron Legacy
BACKING:	Perma Bac

TEST RESULTS:

FLAMING	320

GENERAL PRINCIPLE:

This procedure is designed to measure the specific optical density of smoke generated by the test specimen within a closed chamber. Each specimen is exposed to an electrically heated radiant-energy source positioned to provide a constant irradiance level of 2.5 watts/square cm on the specimen surface. Measurements are recorded through a photometric system employing a vertical beam of light and a photo detector positioned to detect the attenuation of light transmittance caused by smoke accumulation within the chamber. The light transmittance measurements are used to calculate specific optical density, a quantitative value which can be factored to estimate the smoke potential of materials. Two burning conditions can be simulated by the test apparatus. The radiant heating in the absence of ignition is referred to as the Non-Flaming Mode. A flaming combustion in the presence of supporting radiation constitutes the Flaming Mode.

This facility is accredited by the National Voluntary Laboratory Accreditation Program for the specific scope of accreditation under Lab Code 100197. This accreditation does not constitute an endorsement, certification, or approval by NIST or any agency of the United States Government for the product tested. This report is provided for the exclusive use of the client to whom it is addressed. It may be used in its entirety to gain product acceptance from duly constituted authorities. This report applies only to those samples tested and is not necessarily indicative of apparently identical or similar products. Re: Metropolitan Life Insurance Co. – One World Trade Center – 89th Floor
TAA – 991176 – Renovation – Submission One – Self Certification
Release for Construction

Dear Mr. Wittenberg:

This letter responds to your transmittal dated September 2, 1999, requesting a review of the documents listed on Attachment A to this letter. Tenant Alteration Application 991176 is Released for Construction under the Professional Certification Program.

Notification of any comments generated as a result of this review will soon be issued.

This TAA will not be audited by the Quality Assurance Division.

Any changes to the scope of work under this application must be submitted to the Port Authority for review prior to the commencement of any associated work. Only contract documents reviewed by this office are to be released to the field for construction.

The certifying Licensed Professional referred to in Tenant Alteration Application shall contact Mr. Frank DeMartini in writing, at One World Trade Center, 88E, New York, N.Y. 10048, 72 hours prior to start of construction, to schedule a preconstruction meeting. Work scheduling and compliance with Port Authority requirements pertaining to construction work to be performed on the premises will be discussed at the meeting. Mr. DeMartini's telephone number is (212) 435-3212; fax number is (212) 435-2408.

All correspondence or inquiries should be directed to Carlo J. Saavedra, Project Manager, at The Port Authority, One World Trade Center, 88 South, New York, N.Y. 10048, (212) 435-2922; fax (212) 435-8168.

Sincerely,

Joseph Napolitano,
Project Manager, Design Build
Supervisor, Tenant Alteration Applications
The World Trade Department

WORLD TRADE DEPARTMENT

Fire Safety

Note: (BBFAS) Base Building Fire Alarm System

1. Add standard WTC BBFAS demolition note.

2. Preserve existing base building, fire alarm equipment before, during and after demolition. No device, appliance, wiring or other BBFAS equipment is to be removed or disabled until such time as replacement equipment is operational prior to demolition work. The WTC BBFAS maintenance supervisor shall be contacted at 435-5005. For coordination purposes, only the WTC BBFAS maintenance contractor (Siemens-Cerberus Division/Special Projects) is authorized to effect work on existing BBFAS equipment.

3. *Engineer to provide wiring of and details for relocation of existing speakers* including retesting of all cables in accordance with WTC BBFAS guidelines. (Attachment "C" test documents).

4. Contractor to coordinate with WTC BBFAS maintenance supervisor at 435-5005 prior to working on existing BBFAS equipment.

5. Contractor to submit completed wire test reports to WTC BBFAS maintenance supervisor at (FAX) 212-435-5717 24 hours prior to tie in.

HVAC

7. Drawing M-1F: Reduce interior air supply from 1.5 cfm/sf(225 cfm each diffuser) to 0.84 cfm/sf (125 cfm each diffuser) which is the maximum permitted by the base building air system. Provide the supplementary air conditioning unit as needed.

FIRE PROTECTION

8. Drawing SP-2: Revise the sprinkler piping specification as follow:

   All wet system sprinkler piping shall be standard weight, schedule 40 black steel pipe, conforming to ASTM A795/A53 with threaded cast iron fittings, Class 125, or malleable iron fittings, Class 150. Schedule 10 pipes, grooved piping, and *mechanical grooved fittings are not permitted. Victaulic fittings are not permitted* to be used for size 3 in. and under unless otherwise approved.
